R&D

For all this is to be possible EK undertakes a major investment in product development, having an in-house engineering team with ample experience in R&D, industrialisation and production of technological solutions.

TECHNICAL SUPPORT

Ekselans by ITS offers an excellent pre and post sale technical support to the professional. From the technical office, the responsible product managers of the different product ranges address with the utmost respect and professional rigour any queries which the installers may have.

EK IN THE WORLD

Having a well-structured commercial policy and which is geared towards professional distribution, EK distributes its solutions in over 25 countries. This enables us to draw upon the experience provided by the different international markets, which is reflected in the varied offer that is made available to customers, in certain cases with products tailored to the needs of each country.

ZN

- **Ek CAST** improves the guests' multimedia experience in their hotel rooms, allowing them to enjoy both their own multimedia content and their streaming providers on the TV screen.
- Users will feel at home as they enjoy watching the main streaming platforms on the television, both on video (YouTube®, Netflix®, HBO®, PrimeVideo®, Disney®+, Rakuten®...) and in audio (Spotify®, Google Play Music®, Vevo®, TuneIn®...)(1)
- And all of this is confidential and secure for the user thanks to the management tools on the EkCast server, which were completely developed by the EK's R+D.
- EkCast can be implemented in any hotel, regardless of the number of rooms. All that is necessary is an available WiFi network and any type of television in the rooms.
- The Ek Cast system requires a one-time only payment from the hotel. There are no recurring fees or annual royalty payments. EkCast is an excellent investment in CAPEX, which means an improvement in the services offered and in customer satisfaction. EkCast provides all of this without any increase in the operating costs.

**EKCAST CAN BE
IMPLEMENTED IN ANY
HOTEL, REGARDLESS
OF THE NUMBER
OF ROOMS**

Google Chromecast

Solution based on Google® Chromecast®

Adaptable to any type of establishment

No recurring payments

Possibility to configure interface design

Integrated digital signage

Support for promotional marketing

Generation of usage statistics

Option for integration of external URLs

Compatible with hospitality televisions with integrated Google® Chromecast®

Compatible with versions 3 and 4 of Google® Chromecast®

EKCAST.FIRST-CLASS ENTERTAINMENT AND *IN-ROOM* INTERACTION

The **EKCAST** solution brings the multimedia home experience to the hotel. Whether using Android or iOS devices, to enjoy this experience, guests should follow in a few simple steps:

- 1. Step 1.** Connect to the hotel's WiFi network.
- 2. Step 2.** Depending on the content and application desired for playback, the action the user needs to take varies:

1

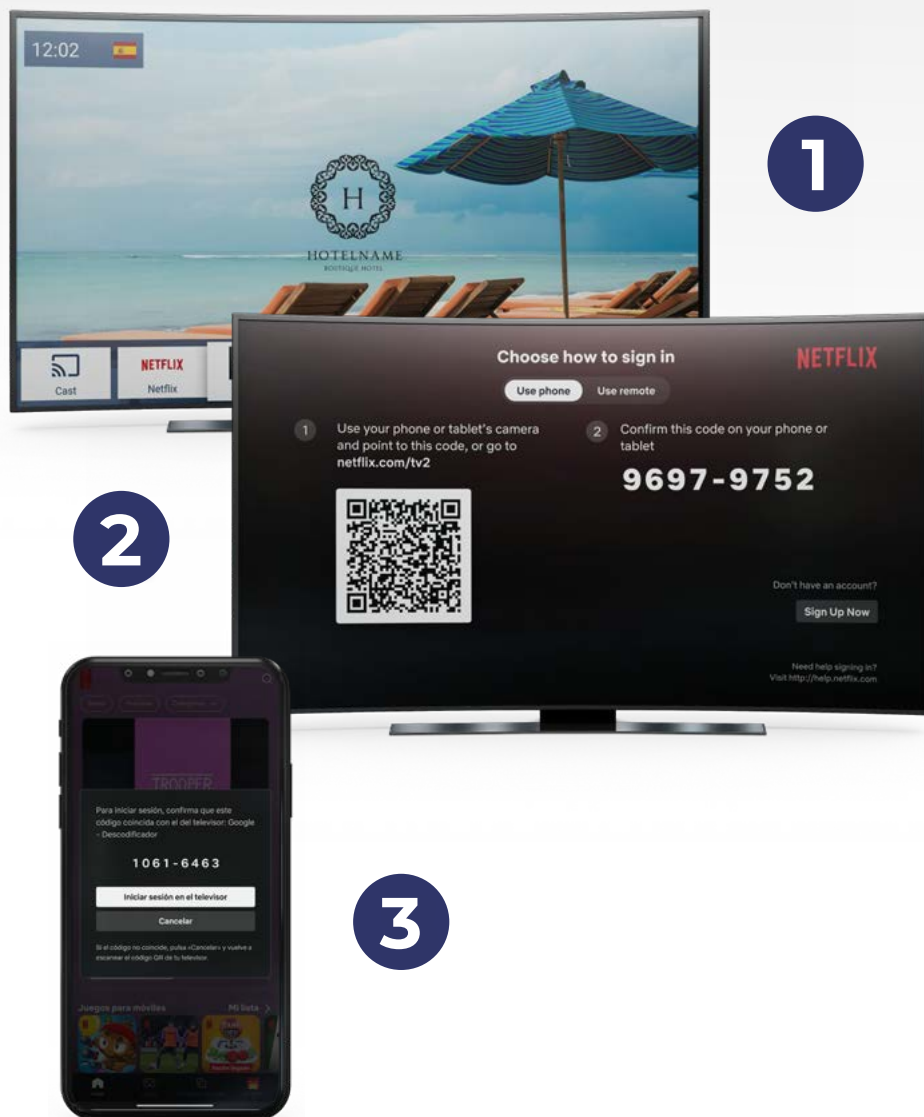

2

THE USE OF NETFLIX® , APPLETV® + , AND OTHER APPLICATIONS.

Netflix® and AppleTV®+

1. Select the Netflix® or AppleTV®+ application using the remote control⁽⁵⁾ to access either of them.
2. Scan the QR code displayed on the screen.
3. Enter the code displayed on the television into the mobile device to access one of them.

Other applications.

1. Select the CAST button using the remote control.

1. Scan the QR code displayed on the screen.

3. Enter the code shown on the television into the mobile device. Accept the terms and conditions.

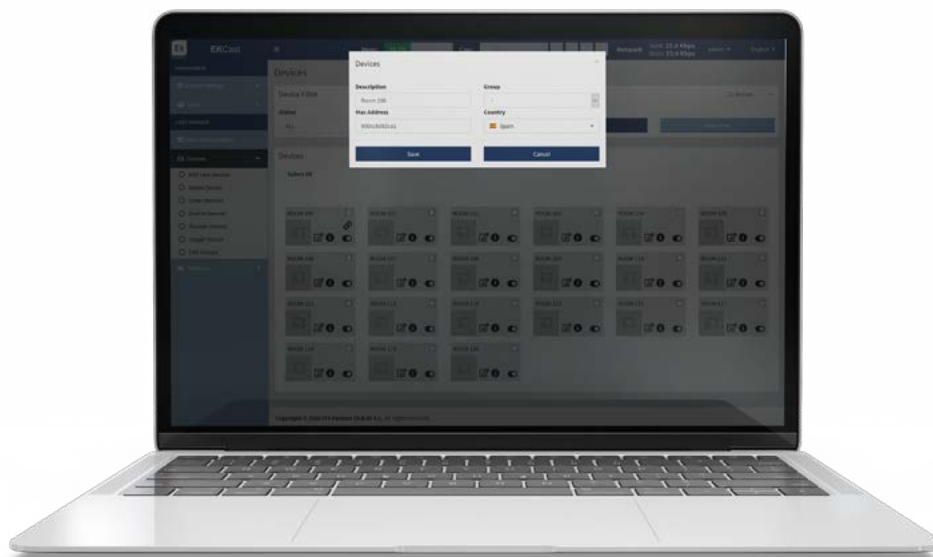

EKCAST: A SIMPLE INSTALLATION THAT EK SIMPLIFIES EVEN MORE

Implementing Ek's ChromeCasting system is very simple. The system is made up of two systems: the EkCast server and the Chromecast® device.

The **Ek Cast management server** will be connected to the hotel computer network⁽⁵⁾ and it will be in charge, among other things, of managing the correct linking of each device to their room television and administer in a confidential and safe way all the users' personal data.

The Google® Chromecast® device should be connected to the television in the room. It will not be necessary to have a specific hospitality model or even a SmartTV. Any device with an HDMI port can be used to access the ChromeCasting services.

The Chromecast® comes with an anti-theft bracket, enabling easy and secure mounting of the device to the television.

To simplify interconnection between the server and Chromecast® devices even more, Ek offers **CCast** system integrators to optimize installation time⁽³⁾.

A POWERFUL TOOL AT THE SERVICE OF THE HOTEL

As well as offering a first-class entertainment service to its guests, EkCast offers multiple functions to the hotel's system administrator. Among other functions, **the online management portal** allows:

- Flexible configuration of the client's user interface and the television's display screen, allowing the configuration of logos, colors, background (colors or images), weather information and a series of images with customizable text, creating a **digital signage system**.
- Configuration of a maximum number of users who can connect simultaneously to the same Chromecast® device.
- Configuration of terms and privacy
- Configuration of domain and use of https.

In relation with Chromecast® in the rooms, the system provides:

- Automatic detection of new devices in the network or manual addition.
- Status monitoring
- Remote activation and deactivation
- Disconnection of the users from the Chromecast®
- Arrangement of the devices into groups

EkCast offers the hotel management Useful statistical information about the viewing habits of guests through the management tools:

- Real-time information about users who are connected to the devices, the Chromecast® which is providing content, and the applications which it has connected with.

- Generation of historical reports in pdf format up to the last 7 days in pdf format.
- Exportation of the “raw” data in csv or xls formats for subsequent analysis.

(1) Compatibility of streaming application with Google® Chromecast®, which depends solely and exclusively on the authorizations and agreements of Google® with the aforementioned users.

(2) The disconnection will be done automatically with the integration of the PMS system in the hotel. Alternatively, it can be managed directly and simply from the Ek Cast.

(3) It is essential that the system has at least a switch with certain routing functions. Consult the Ek technical team with further questions.

(4) Consult the terms and conditions of the CCast with the EK representatives.

(5) It is possible to use either the Google® Chromecast® remote control or the television's own remote control by activating the HDMI CEC command on the television.

IMPROVED SYSTEM WITH NEW FEATURES

1 New video play option

Up to now, only images could be reproduced. With the latest version can now play video, image, video slideshows or image slideshows.

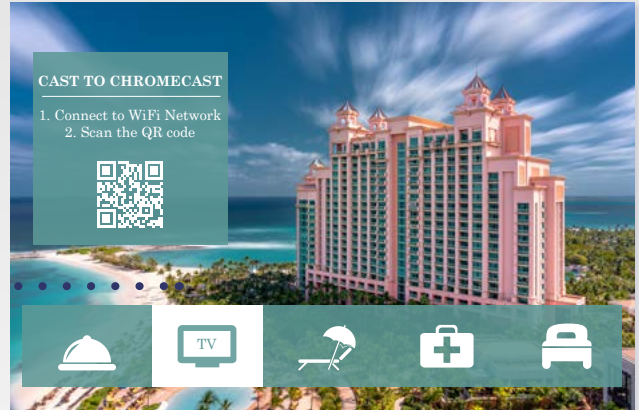

VIDEO OR IMAGE CAROUSEL

2 New URL option

The new version has the option to configure an external URL in the manager so that hotels / integrators / installers can design a dedicated web page to include the QR code generated by Ek CAST. We have a basic example of a website for this purpose.

Website external to **Ek Cast** generated by the Hotel or by a third-party company

Insertion of the QR generated by the **Ek Cast**

3 Compatibility with Philips™ TVs with built-in Google® Chromecast®
