NEW CABLE DISPENSER CONCEPT PATENTED BY EK

Ek ROLLER PATENT PENDING

WHAT IS IT?

Ek Roller is a new concept of cable dispenser patented by EK that presents unique advantages in the market. Its low weight and size allows it to be stored in the toolbox and it makes it very easy to use in any situation and environment.

Thanks to its robust steel structure, supports both light reels of less than 1kg and reels up to 35kg.

- ✓ The quick fixing system to the reel allows an easy and toolless swap in just two seconds
- ✓ Once fixed, it is automatically integrated into the exclusive EK reel with handle, which makes it even easier to use and portable
- ✓ EK Roller allows not only the unwinding of cable by simply pulling it, but also makes it easy the tedious task of winding the excess cable at the end of the installation
- ✓ The EK reels compatible with EK Roller also consist of an innovative system that prevents the excess cable from becoming entangled and guarantees a fluid unwinding of the same

Ek ROLLER +

Includes a stabilizer accessory that adds weight to optimize the rotation of light coils or with little cable. The accessory has a optimized diameter for the range of PFR and PCR references, and it's also used on light coils compatible with **Ek ROLLER**
