## **INTRODUCTION:**

The MU CAST direct app allows users to set up and/or clone remote controls connected to their mobile devices. This manual guides you through the process of configuring/cloning a remote control, from accessing the feature to managing the cloned configurations.

### **Packaging Contents:**

1. Remote control
2. 2 AAA batteries

## SETTING UP THE REMOTE CONTROL:

Download the app from the Google Play Store or the Apple App Store.  
Install the following App on a device with Bluetooth activated and an Internet connection.

|                                                                                   |                   |                                                                                    |                 |
|-----------------------------------------------------------------------------------|-------------------|------------------------------------------------------------------------------------|-----------------|
|  | Google Play Store |  | App Store Apple |
|-----------------------------------------------------------------------------------|-------------------|------------------------------------------------------------------------------------|-----------------|

|                                                                                     |                                                                        |
|-------------------------------------------------------------------------------------|------------------------------------------------------------------------|
|   | Open the app and press OK on the remote control until the LED flashes. |
|  | The remote will connect with the phone.                                |

|                                                                                    |                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <p>When you continue, a screen will appear to select the TV whose remote control you want to incorporate into the MU CAST remote control.</p> <p>If there are any settings already saved, clone option will also appear.</p> |
|  | <p>Selecting the option to configure the TV remote control will bring up this screen. Once selected, a list of the different TV manufacturers will be displayed.</p>                                                         |

|                                                                                    |                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <p>We will choose the brand of the TV so that the different remote control codes related to the chosen manufacturer are downloaded.</p>                                                                                                                           |
|  | <p>Once the TV has been selected, different remote control configurations will be loaded sequentially.</p> <p>The App will ask you to try a key to see if it is the correct one. If not, another configuration will be loaded until the correct one is found.</p> |

|                                                                                    |                                                                                                                                                         |
|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
|   |                                                                                                                                                         |
|  | <p>Then with "done" the configuration will be saved. There is also the option to save this configuration to clone it in successive remote controls.</p> |

## CLONING PROCESS:

|                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                   |
|------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <p><b>Step 1: Access the settings screen</b></p> <p>Once the remote has successfully connected to the app, check if it supports cloning. If cloning is available, a button labeled <b>Save/Load Settings</b> will appear <b>below</b> the device information. Click the <b>Save/Load Settings</b> button. This will take you to the screen where the saved settings are listed, if available.</p> |
|  | <p><b>Step 2: Clone the remote control</b></p> <p>If no settings are saved, or if you want to create a new clone, tap the <b>Clone Remote button</b> at the bottom of the screen.</p>                                                                                                                                                                                                             |

|                                                                                    |                                                                                                                                                                                                 |
|------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <p><b>Step 3: Enter the name of the settings</b></p> <p>A dialog box will appear asking you to enter a name for the settings. Once the name is entered, press <b>Save</b>.</p>                  |
|  | <p><b>Step 4: Save Settings</b></p> <p>It will take a few seconds for the app to clone itself and save the settings. After saving, the newly created configuration will appear in the list.</p> |

## MANAGEMENT OF CLONED CONFIGURATIONS:

|                                                                                    |                                                                                                                                                                                                                                                                  |
|------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|   | <p><b>Step 6: Load a Configuration</b></p> <p>To reload a saved configuration onto the remote control, tap the <b>Load icon</b> next to the configuration name.</p>                                                                                              |
|  | <p><b>Step 7: Rename a Configuration</b></p> <p>If you need to rename a configuration, tap the <b>pencil</b> icon next to it. A dialog box will open where you can update the name by deleting the old one, entering the new name, and clicking <b>Save</b>.</p> |

|                                                                                   |                                                                                                                                                                                                   |
|-----------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  | <p><b>Step 8: Delete a Configuration</b></p> <p>To delete a configuration, swipe left on the configuration name. A delete option will appear, allowing you to remove the saved configuration.</p> |
|-----------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

## NOTE:

The procedure described above will configure the remote control unit with the codes of the selected TV. This way will be possible to control the TV via IR. Then the remote control unit, in its BT option, bluetooth, must be linked with the second device to be commanded: EK Cast (CRP 4K) or EK Hotel (STB Prof).

## Pairing with CRP 4K:

|                                                                                     |                                                                                                          |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|
|  | <p>Tap the sequence:</p> <p>Back, Down, Up, Left, Right, OK with the original CPR 4K remote control.</p> |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------|

|                                                                                    |                                                                            |
|------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
|   | <p>PIN to unlock access to the Settings menu:<br/>9876</p>                 |
|   | <p>We will access the Equipment Settings menu...</p>                       |
|  | <p>and the Controls and Accessories; We will follow the shown steps...</p> |

### STB Prof Linkage:

|                                                                                     |                               |
|-------------------------------------------------------------------------------------|-------------------------------|
|  | <p>Enter into Tools menu.</p> |
|-------------------------------------------------------------------------------------|-------------------------------|

|                                                                                     |                                                                            |
|-------------------------------------------------------------------------------------|----------------------------------------------------------------------------|
|    | <p>PIN to unlock access to the Settings menu: 9876.</p>                    |
|    | <p>ACCEPT</p>                                                              |
|   | <p>We will access the Equipment Settings menu...</p>                       |
|  | <p>and the Controls and Accessories; We will follow the shown steps...</p> |
